## **FESCO Energy announces the addition of Elodie Michaels as an Executive Advisory Board Member**

**Frederick, MD, February 5, 2019** – FESCO Energy (“FESCO” or the “Company”), a company focused on energy resiliency and efficiency, is pleased to announce the appointment of experienced energy executive and operations manager Ms. Elodie Michaels to its Executive Advisory Board.

Elodie Michaels serves as Operating Advisor to Pegasus Capital Advisors, a private, alternative asset management firm providing strategic growth capital to middle-market companies focused on sustainability and wellness sectors. Prior Ms. Michaels served as a Vice President of Energy and Sustainability at CBRE from 2011 to 2016, providing strategy and operating plans for the deployment of utility cost savings, energy efficiency and sustainable solutions programs. She led the Americas Energy and Sustainability teams serving Fortune 500 clients. Previously Elodie served in a variety of roles with increasing responsibilities at Ewing/Trigen/Veolia providing sales, operations and M&A leadership. Her roles included plant operations, business development, critical negotiations, construction management and business unit P&L management. Her areas of technical expertise include biomass, cogeneration, cryogenic pumps, and polymers.

“We are fortunate to have Ms. Elodie Michaels join our Advisory Board” stated Aldric Seguin, Managing Member of FESCO, “Elodie is a highly accomplished and proven industry veteran, having her available to us will prove to be invaluable. Her technical insight and decades of experience in the energy sector across multiple management and strategic roles will greatly benefit the company as we continue to rapidly grow.”

“Connecting capital with innovation to decrease the global carbon footprint, improve operational efficiencies and improve people’s wellness are my goals,” commented Ms. Michaels, “FESCO’s focus on energy and the public sector will help create new intersections between innovation, commercial and governmental expertise in sustainable energy solutions, while supporting economic growth and reducing carbon footprint.”

### **About FESCO Energy**

FESCO Energy provides complete turnkey energy supply, demand, conservation and resiliency projects managed by an executive team with over 80 combined years of proven experience. Based in Frederick, Maryland, FESCO develops and implements distributed and renewable power generation, energy and water efficiency, smart micro-grids, cyber secure power management and commodity supply for Federal, educational, public sector, commercial, and industrial customers. It helps customers develop electricity and natural gas cost-of-service analysis and advises on rate designs using a cloud-based analytics platform that ensures the right rate based on customer usage patterns.
